Forecast for Monday 10 May 2021

Weather: Heavy showers will move north-eastwards through the hills today, with a risk of thunderstorms. South-westerly winds will increase through the day with the strongest gusts expected in and around heavier downpours. Between showers there will be some short lived sunny spells and overnight conditions will dry out with some clear spells developing.

Chance of cloud free mountain/hill tops above 600m: 40% becoming 80% in the evening.

Visibility: Good in general but frequently suddenly deteriorating in and around showers, cloud bases will be generally around 600m through the day, occasionally lifting to above 1000m and breaking up. In the evening cloud will widely break and will lift to occasionally cover the highest hills.

Meteorologist's View

A very changeable day, though it will feel fairly warm in the sun it will be very windy and unpleasant on hill tops in any heavy showers. The risk of gales, most likely in heaviest showers on highest summits, will make for challenging walking conditions.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Sun 09 May 2021	30mm	66.6mm	66.6mm

Forecast for Tuesday 11 May 2021

Weather: Sunny spells and scattered showers, feeling pleasant in the sunshine with high UV levels. Showers will be less frequent than Monday but still heavy at times, and it will remain windy. Drier and clearer overnight

Maximum wind: Southerly means 25mph and gusts of 40mph.

Chance of cloud free mountain/hill tops above 600m: 60% becoming 80% overnight.

Visibility: Generally very good but deteriorating in showers through the day with scattered cloud around 600m.

Temperature: **Valleys:** Plus 7 Celsius becoming Plus 11 Celsius.
At 600m: Plus 2 Celsius becoming Plus 6 Celsius.
Freezing level: Above the summits.
